ferinject
ferric carboxymaltose

Good news: Pharmac & POAC funding criteria for ferric carboxymaltose now more closely aligned

Criteria changes for POAC Ferinject® infusion funding – Metropolitan Auckland Region (Auckland, Waitemata and Counties Manukau)

Primary Options for Acute Care (POAC) have adjusted their clinical criteria for funding the administration of Ferinject to be more be more closely aligned to Pharmac's Ferinject funding criteria.[1] This is good news for patients and HCPs alike, because it simplifies the funding scenario.

In particular, the newly aligned POAC and Pharmac criteria for an initial subsidy application[1,2,†] are:

Patient has been diagnosed with anaemia, and ONE of the following:

- Anaemia and ferritin ≤ 20 mcg/L
- Anaemia and ferritin 20–50 mcg/L AND CRP ≥ 5 mg/L
- Patient has chronic inflammatory disease with symptoms of anaemia

Additional required criteria (ONE of the following):

- Oral iron treatment has proven ineffective
- Oral iron treatment has resulted in dose-limiting intolerance
- Rapid correction of anaemia is required

Funding criteria forms

You will still need to complete both the POAC and the Pharmac Special Authority forms to arrange funding for eligible patients.

For your reference, the forms can be found at the links below:
